Are [automatic hand dryers](#) cost effective? Whilst they can appear to be a little costly to purchase and install the long term benefits of purchasing automatic hand dryers outweigh the negative aspects. If currently you use paper towel dispensers then you will realize that these require replenishing on a regular basis and this can amount to large sums of money over a long period of time. Automatic hand dryers are energy efficient, quick and easy to use. After the initial purchase and installation the only fee you should incur would be one of maintenance. You will never have to worry about running short on paper towels again.
